

ACS Excavator 

# Progressive EZLink Thumb<sup>®</sup>

*Innovation from ACS Industries*

The Progressive EZ Link Thumb design protects the hydraulic cylinder rod by placing it up and away from potential contact with any material being handled while maintaining a full transfer of force to the thumb.

It also has an improved range of tuck and extension motion and installs in 1/3 the time of conventional thumbs - about 4 hours.

Quality that works.<sup>®</sup>

# Progressive EZLink Thumb®

*Innovation from ACS Industries*

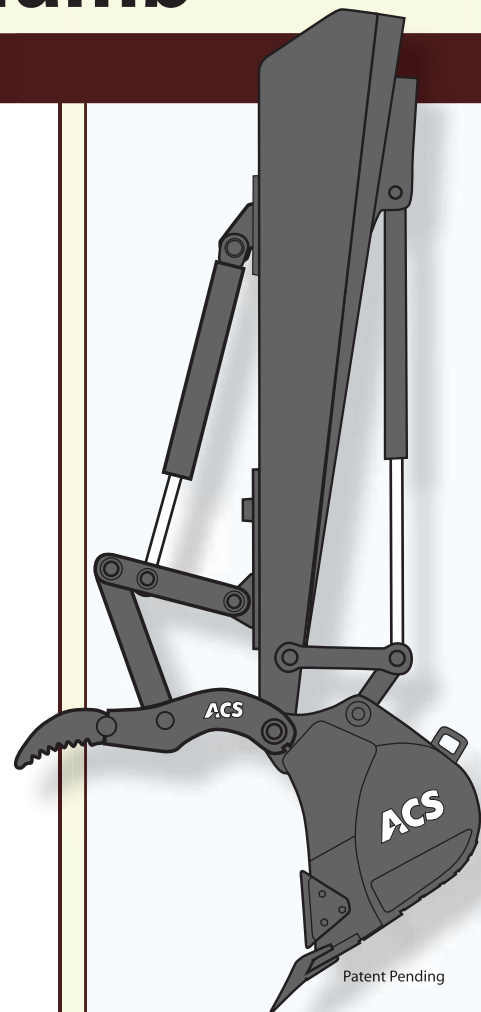

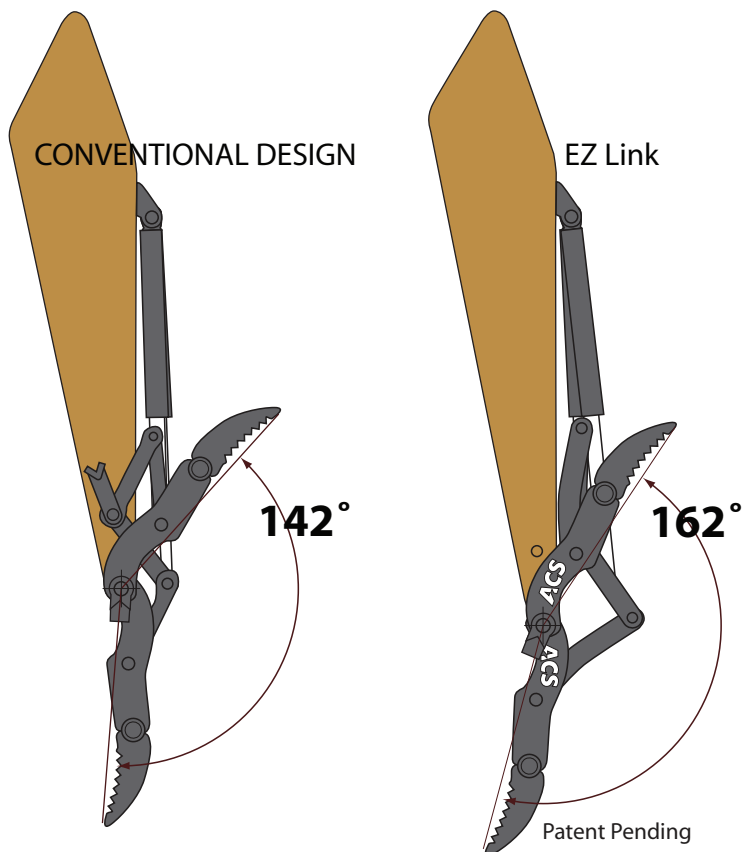

## INSTALLATION

- ✘ Installs in 1/3 the time of conventional thumbs
- ✘ Less chance for installation errors
- ✘ Economical to purchase
- ✘ Can be installed on many shorter sticks

## PERFORMANCE

- ✘ Greater range of motion
- ✘ Moves cylinder rod further out of danger
- ✘ Shorter pins. Less wear, lower replacement costs

## ROTATION ADVANTAGE
